Unique health challenges of refugees and asylum seekers

**Poorly controlled chronic conditions**
Hypertension, diabetes, epilepsy, badly healed injuries, out of medication

**Maternity care**
Late presentation, FGM complications, trauma, poverty, malnutrition, holistic support

**Mental health and specialist support**
Depression, isolation, PTSD, torture, FGM, sexual and gender-based violence

**Untreated communicable diseases**
TB, HIV/STIs, parasitic infections, missing vaccines

**Language translation needs**
- Do you need an interpreter?
- What language/dialect?
- What gender?
- Any cultural needs?
