Redefining the CPSC Membership

The committee continues to deal with a variety of issues that affects its wide and disparate membership. We have only managed to meet once this year due to the pandemic, however in the time we have had we have mainly been focusing on establishing who our membership is and what types of roles fall within our remit as a committee.

As we know there is currently inconsistency with how members have chosen to categorise themselves within the civil service membership grades. We’re also aware that some may fall within other membership categories such as public health and armed forces but would also fall within the civil service.

We have successfully sought changes to the membership categorisation of our civil service grades to more relevant and identifiable titles. We now face the challenge of persuading our members to update their details for this. Only then can we establish all the different types of roles our committee truly represents so that we can better engage with our members and ensure the committee are reflective of this.

Elections

A number of elections will be running over the summer where we hope to encourage new members to join and bring further issues to the fore in the committee to discuss.
